

Vishal Kumar Mathuri

Blockchain Developer

📞 9082135308 ✉️ vishalkumarmathuri@gmail.com 📍 Patna in [linkedin.com/in/vishal-mathuri/](https://www.linkedin.com/in/vishal-mathuri/) 🐙 [Github.com/vishalmathuri](https://github.com/vishalmathuri)

SUMMARY

Blockchain Developer with hands-on experience building decentralized applications and smart contract protocols on Ethereum using Solidity and modern Web3 technologies. Developed **50+ smart contracts and 10+ full-stack blockchain applications** including NFT marketplaces, decentralized fundraising platforms, identity verification systems, and tokenized applications.

Strong foundation in **software engineering, protocol design, distributed systems, backend architecture, APIs, and blockchain networks**. Experienced in building **secure and scalable backend systems**, optimizing gas usage, and integrating Web3 wallets with modern frontend frameworks.

A **reliable and disciplined developer** with strong **adaptability, collaboration, and cross-functional teamwork** skills, experienced in automation, backend services, and scalable system development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Solidity, Python, HTML, CSS **Smart Contracts:** ERC-20, ERC-721, Staking, Vesting, NFT Marketplace Protocols
Blockchain: Ethereum, Polygon, Hyperledger Fabric, EVM, Tokens, **Web3 Development:** React.js, Node.js, Express.js, REST APIs, MetaMask Integration
Tools: Hardhat, Foundry, Remix, OpenZeppelin, Ethers.js, Web3.js **Security:** ReentrancyGuard, Ownable, AccessControl, Pausable, Event Logging
Deployment: Ethereum Sepolia, Contract Verification, IPFS (Pinata), Vercel, Render **Developer Tools:** Git, GitHub, VS Code, PyCharm
Blockchain Expertise: Smart Contract Development, Security Practices, Gas Optimization, Web3 Wallet Integration, Distributed Systems
DevOps & Systems: CI/CD, Automation, Network Architecture, API Development, Backend Services

PROFESSIONAL EXPERIENCE

Blockchain Developer Jul 2025 - Present

Freelance

- Developed and deployed 50+ Solidity smart contracts implementing ERC-20, ERC-721, staking, governance, and marketplace functionality.
- Built **10+ full-stack Web3 applications** integrating smart contracts with **React.js frontends, Node.js backend services, REST APIs, and automated deployment workflows**.
- Implemented **MetaMask wallet authentication** and blockchain interactions using **Ethers.js**.
- Fortified smart contract security by incorporating OpenZeppelin contracts & the Hardhat framework, significantly reducing security breaches & enhancing contract robustness using **secure design patterns such as ReentrancyGuard and role-based access control**.

Senior Content Developer Jul 2019 - Mar 2023

Think & Learn Pvt Ltd Bengaluru, IN

- Orchestrated scheduling operations for over 200 student batches across multiple grade levels, achieving **100% operational accuracy** & enhancing workflow efficiency.
- Enhanced an automated concept-tagging system, achieving **95% classification accuracy** through manual verification & systematic quality checks, significantly boosting system efficiency & reducing errors.
- Crafted & executed structured Learning Journeys for academic programs utilizing **digital learning platforms**, resulting in a 96% success rate & significantly enhancing the overall digital learning experience.
- Elevated student engagement & overall learning experience by designing & curating interactive educational content, mock tests, & learning modules for **Byj's TV & BHL P programs**, resulting in increased user satisfaction & engagement.
- Resolved student support & academic operations requests using **Salesforce**, achieving **98% resolution accuracy** within 24 hours & ensuring uninterrupted course delivery.
- Collaborated with academic operations, HR, and support teams while maintaining strong **cross-team communication and coordination**.

KEY PROJECTS

[NFT Marketplace dApp](#)

Tech Stack: Solidity, OpenZeppelin, React.js, Ethers.js, Node.js, Express.js, IPFS (Pinata), Ethereum – Ethereum Sepolia

- Developed a decentralized NFT marketplace to mint, list, and trade NFTs using ERC-721 smart contracts built with Solidity and OpenZeppelin.
- Built a **full-stack Web3 app with React.js frontend, Node.js/Express backend, and MetaMask integration via Ethers.js for blockchain interaction**.
- Stored NFT metadata on **IPFS (Pinata)** and deployed the application on [Vercel](#) (frontend) and [Render](#) (backend).

[USDC Fundraising dApp](#)

Tech Stack: Solidity, ERC-20, Hardhat, JavaScript, Ethers.js, Node.js, Ethereum

- Developed a decentralized fundraising platform enabling users to **contribute to campaigns using ERC-20 USDC tokens**.
- Implemented Solidity smart contracts for **secure fund collection, contribution tracking, and controlled withdrawals**.

- Integrated **MetaMask wallet connectivity** using **Ethers.js** and deployed contracts on Ethereum Sepolia using **Hardhat**.

Soulbound Identity Verification System

Tech Stack: Solidity, ERC-721, Ethereum, JavaScript, Web3

- Designed a decentralized identity system using **Soulbound Tokens (non-transferable NFTs)** to represent verifiable credentials.
- Developed frontend interaction with **Web3 wallet integration (MetaMask)** for credential issuance and verification.
- Demonstrated a blockchain-based approach for **secure decentralized identity management**.

Role-Based Access Control (RBAC) Smart Contract dApp

Tech Stack: Solidity, OpenZeppelin, Ethereum, Hardhat

- Implemented **role-based access control mechanisms** in Solidity to manage user permissions in decentralized applications.
- Utilized **OpenZeppelin libraries** for secure contract ownership and access management.
- Designed contract logic to restrict sensitive functions to **authorized roles only**.

INTERNSHIPS

Blockchain Developer	Mar 2026 - Apr 2026
EtherAuthority	Remote
• Assisted in building Web3 dApps integrating smart contracts with frontend and backend systems. • Worked with ERC-20 and ERC-721 token standards and participated in smart contract security testing and reviews.	
Blockchain Developer	May 2025 - Jul 2025
Leafny Web Pack	Remote
• Developed and tested smart contracts for decentralized applications using Solidity and Ethereum. • Worked closely with the development team to enhance technical solutions, applying analytical thinking and continuous learning.	
Blockchain Developer	Jan 2025 - Feb 2025
Estatos	Remote
• Developed and optimized smart contracts for blockchain operations. • Worked on tokenization and DeFi protocols. • Contributed to secure and efficient smart contract deployments. • Collaborated with the tech team to enhance solutions while demonstrating problem-solving and a growth mindset.	
Solidity Developer	Jul 2024 - Dec 2024
Nexus Network	Remote
• Developed bridge contracts for the relayer-based cross-chain transactions. • Strengthened smart contract security and optimization practices. • Actively participated in team collaborations and implemented feedback for continuous improvement.	

EDUCATION

Post Graduate Diploma in Blockchain (Coursework Completed)	Mar 2023 - Mar 2024
IIIT Bangalore & upGrad	Bengaluru, IN
• Completed advanced coursework covering JavaScript, Node.js, Ethereum smart contract development, and Hyperledger Fabric. • Developed Ethereum-based smart contract architectures for decentralized applications including DeFi systems. • Designed system architecture for the UPSTAC healthcare application, focusing on scalable and secure blockchain integration. • Explored blockchain-based KYC systems, Hyperledger Fabric network setup, and cross-chain frameworks. • Gained hands-on experience in building decentralized applications and enterprise blockchain solutions.	
Dual Degree (B.Tech + M.Tech) – Energy Science & Engineering	Jul 2014 - Jul 2019
Indian Institute of Technology Bombay (IIT Bombay)	Mumbai, IN
• Pursued Dual Degree (B.Tech + M.Tech) • Secured 61%	

ADDITIONAL INFORMATION

- **Languages:** Fluent in Hindi (Native) and English (Professional)
- **Interests:** Reading and Cycling
