

Vishal Kumar Mathuri

SOLANA DEVELOPER | RUST | ANCHOR

9082135308 | vishal789mathur@gmail.com | Patna, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Solana Developer focused on Rust and Anchor program development, with completed crowdfunding and cross-chain systems deployed on Devnet. Experienced with PDAs, account constraints, signer and ownership validation, SOL transfers, refunds, Wallet Adapter, Phantom, versioned transactions, RPC simulation, and transaction-size debugging. Complementary Solidity and EVM experience supports dual-chain and interoperability work.

TECHNICAL SKILLS

Solana development: Rust, Solana, Anchor, PDAs, account constraints, CPI concepts, SOL transfers, Devnet

Client integration: TypeScript, Solana Web3.js, Wallet Adapter, Phantom, versioned transactions, simulation, RPC debugging

Cross-chain: LayerZero V2, OFT, peer validation, replay protection, fee quoting, Ethereum Sepolia to Solana Devnet

EVM development: Solidity, Foundry, Hardhat, OpenZeppelin, Chainlink, Ethers.js, MetaMask

Full stack and tools: React, Node.js, Express, REST APIs, Git, GitHub, Vercel, Render

PROFESSIONAL EXPERIENCE

Blockchain Developer

Jul 2025 - Present

Freelance

- Built and deployed blockchain applications across Solana and EVM environments, owning program or contract implementation, testing, wallet integration, deployment, and production debugging.
- Developed Rust/Anchor and TypeScript workflows for PDA-based state, account validation, SOL transfers, Phantom signing, transaction simulation, and Devnet deployment.
- Applied security controls and test strategies across Solidity and Anchor code, including access restrictions, failure-path validation, fuzzing, and stateful invariants.

Senior Content Developer

Jul 2019 - Mar 2023

Think & Learn Pvt Ltd | Bengaluru, India

- Managed scheduling for 200+ student batches and improved an automated concept-tagging workflow to 95% classification accuracy through systematic validation.
- Created structured digital learning journeys with a reported 96% success rate and resolved Salesforce-based academic support requests with 98% accuracy within 24 hours.

SELECTED BLOCKCHAIN PROJECTS

1. Solana Crowdfunding Protocol

Stack Rust | Solana | Anchor | PDAs | TypeScript | Wallet Adapter **Links** [GitHub](#) [Live](#)

- Built and deployed an Anchor program on Solana Devnet for campaign creation, SOL contributions, funding-goal and deadline enforcement, creator withdrawals, and contributor refunds.
- Designed PDA-based campaign state and Anchor constraints that validate ownership, signers, contribution state, withdrawal eligibility, and refund conditions without externally generated program-controlled private keys.
- Delivered a TypeScript and Wallet Adapter frontend for wallet-connected campaign workflows, with tests covering funded and failed campaigns, unauthorized withdrawals, deadline boundaries, and refunds.

2. LayerZero Cross-Chain Protocol

Stack Solidity | Rust | LayerZero V2 | Anchor | Foundry | React **Links** [GitHub](#) [Live](#)

- Engineered bidirectional LayerZero V2 messaging and OFT transfers between Ethereum Sepolia and Solana Devnet, with peer validation, message verification, replay protection, fee quoting, and delivery tracking.
- Built a unified MetaMask and Phantom interface and normalized Solana versioned transactions through simulation, signer inspection, and transaction-size diagnostics, producing a 1,171-byte no-ALT signing path.
- Deployed and tested the Solidity and Rust/Anchor components end to end across both networks, including wallet signing and cross-chain delivery verification.

3. EVM Lending Protocol

Stack Solidity | Foundry | Chainlink | OpenZeppelin **Links** [GitHub](#)

- Engineered an overcollateralized, multi-asset lending protocol supporting supply, withdrawal, borrowing, repayment, indexed interest accrual, and liquidation across modular pool, reserve, risk, and interest-rate components.
- Implemented health-factor checks, collateral and liquidation thresholds, utilization-based rates, multi-decimal normalization, scaled accounting, and defensive Chainlink validation for stale, incomplete, invalid, or future-dated prices.
- Validated the protocol with 227 passing Foundry tests across 12 suites covering unit, integration, fuzz, invariant, failure-path, and security behavior; deployed and source-verified the contracts on Ethereum Sepolia.

4. NFT Marketplace

Stack Solidity | ERC-721 | React | Ethers.js | IPFS | Node.js **Links** [GitHub](#) [Live](#) [API](#)

- Built a full-stack ERC-721 marketplace for minting, listing, purchasing, and transferring NFTs through deployed Solidity contracts and a wallet-connected React interface.
- Integrated Ethers.js, MetaMask, OpenZeppelin, and IPFS/Pinata; deployed the frontend on Vercel and backend services on Render for a publicly testable application.

BLOCKCHAIN INTERNSHIPS

Blockchain Developer

Mar 2026 - May 2026

EtherAuthority | Remote

- Built and tested a Telegram Mini App with wallet-connected CoinFlip, Dice, Wheel, and Find the King games, covering game logic, betting flows, and contract integration.

Blockchain Developer

May 2025 - Jul 2025

Leafny Web Pack | Remote

- Supported Web3 dApp integration across smart contracts, frontend and backend systems, including ERC-20, ERC-721, and security testing.

Blockchain Developer

Jan 2025 - Feb 2025

Estatos | Remote

- Developed and optimized smart contracts for tokenization and DeFi workflows and contributed to secure deployment practices.

Solidity Developer

Jul 2024 - Dec 2024

Nexus Network | Remote

- Developed relay-based bridge contracts and strengthened smart-contract security and gas-optimization practices through team review.

EDUCATION

Post Graduate Diploma in Blockchain

Mar 2023 - Mar 2024

IIIT Bangalore and upGrad | Bengaluru, India

- Coursework included Ethereum development, JavaScript, Node.js, Hyperledger Fabric, blockchain architecture, KYC, and cross-chain frameworks.

Dual Degree BTech and MTech in Energy Science and Engineering

Jul 2014 - Jul 2019

Indian Institute of Technology Bombay | Mumbai, India

- Graduated with 61%.

Languages Hindi (Native) | English (Professional)
