SUMMARY

Full-Stack Developer with hands-on experience building responsive **React.js interfaces**, **Node.js/Express backend services**, REST APIs, and **MySQL-backed workflows**. Completed a Diagnostics Workflow Portal and Field Screening PWA covering sample/result management, role-based review, offline drafts, and synchronization. Experienced in frontend/backend integration, debugging, testing, and deployment, with an interest in reliable software for diagnostics and field operations.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, responsive design, Progressive Web Apps (PWA)
Backend & Databases: Node.js, Express.js, REST APIs, server-side validation, MySQL, SQL, schema design
Testing & Tools: Unit/integration testing, end-to-end API testing, debugging, Git, GitHub, Docker, Vercel, Render
Additional: Solidity, smart contracts, Ethers.js, Web3.js | **Languages:** Hindi (Native), English (Professional)

PROFESSIONAL EXPERIENCE

Full-Stack Developer Freelance	Jul 2025 - Present
- Built React.js frontends, Node.js backend services, and REST APIs for full-stack applications, including Web3 integrations. - Implemented API endpoints for authentication, data handling, and application logic; integrated frontend interfaces with backend services. - Debugged and tested application flows using unit and integration tests; handled frontend development, backend integration, and deployment.	
AI Full-Stack Developer (Part-time) EtherAuthority	Mar 2026 - Jul 2026 Remote
- Built a Telegram Mini App featuring Coinflip, Find the King, and Wheel; implemented game logic, betting flows, and result computation. - Collaborated on frontend/backend integration and testing to deliver responsive in-app gameplay.	
Full-Stack Developer A2S Seva Foundation	Mar 2025 - Mar 2026
- Built and maintained JavaScript, React, and Node.js tools supporting educational programs; developed REST APIs and database-backed features for student progress, assignments, and program records. - Debugged and tested features based on user feedback; combined application development with daily part-time coding instruction for Grade 10 students.	
Senior Content Developer Think & Learn Pvt Ltd	Jul 2019 - Mar 2023 Bengaluru, India
Managed academic operations for 200+ student batches and supported digital learning programs.	

SELECTED FULL-STACK PROJECTS

Diagnostics Workflow Portal

Stack: React.js, Node.js, Express.js, MySQL, REST APIs, Docker **Status:** Completed

- Built sample registration, status updates, result entry, and searchable approved-result history using a React frontend and MySQL-backed Express APIs with server-side validation.
- Implemented staff/reviewer roles, result approval and rejection, and an ordered audit trail using synthetic diagnostic records.
- Validated the API workflow through end-to-end tests covering role restrictions, result correction, approval, and history; deployed on Render.

Live demo: diagnostics-workflow-portal-1.onrender.com

Field Screening PWA

Stack: React.js, PWA, Node.js, Express.js, REST APIs **Status:** Completed

- Built a mobile-friendly field screening application with offline draft storage, input validation, and visible synchronization status.
- Implemented record submission and synchronization when connectivity returns, with a staff review dashboard for monitoring submissions.
- Integrated frontend/backend flows with responsive layouts and error handling for data capture in low-connectivity conditions.

Live demo: field-screening-pwa.vishalmathuri.workers.dev

NFT Marketplace (Full-Stack Web3 Application)

Stack: React.js, Node.js, Express.js, REST APIs, Ethers.js, Solidity, IPFS/Pinata **Status:** Completed

- Built a full-stack marketplace with a React.js interface for browsing, minting, listing, and purchasing NFTs, backed by Node.js/Express services and REST APIs for application logic and metadata handling.
- Integrated wallet-based authentication and transaction flows using Ethers.js and MetaMask, connecting the frontend to deployed smart contracts with clear loading, success, and error states.
- Implemented decentralized metadata storage with IPFS/Pinata and linked asset data to the application layer for consistent display across the UI.
- Deployed the React frontend on Vercel and the backend on Render, delivering a live, publicly testable application.

ADDITIONAL EXPERIENCE

Full Stack & Blockchain Developer — Leafny Web Pack	May 2025 - Jul 2025
Built dApp features connecting Solidity/Ethereum contracts to frontend and backend systems; contributed to testing and security reviews.	
Blockchain Developer — Estados	Jan 2025 - Feb 2025
Optimized and deployed smart contracts supporting tokenization and DeFi workflows.	
Solidity Developer — Nexus Network	Jul 2024 - Dec 2024
Developed cross-chain bridge contracts for relay-based transactions and improved contract security practices.	

EDUCATION

IIT Bombay - Dual Degree (B.Tech + M.Tech), Energy Science & Engineering | Jul 2014 - Jul 2019
IIIT Bangalore & upGrad - Post Graduate Diploma in Blockchain | Mar 2023 - Mar 2024
